PAGES 2 ENCLOSURES (NO. & TYPE).

REMARKS.

25X1

1. Building materials and equipment were continually being shipped by rail to the Horseburg (N 52/D 91) airfield. Brick clinker, cement, boards, beams, field railway equipment, and conveyor belts were observed primarily. On 10 December 1950, 136 lorries, three Diesel engines, five conveyor belts, and an excavator were seen at the field. About 400 cubic meters of cement were also seen. [redacted] 1,000 square meters of window glass, to be used in the hangars, had been delivered up to 28 November 1950. (1)

- 25X1 2. [REDACTED] the following boundaries had been fixed for the airfield: On the east, Lauchstaedter Strasse; on the south the old boundary extended to the west 200 meters; on the west from a point 200 meters west of the target range due north to the Chausseehaus in Krappendorf; and on the north, from Chausseehaus east to Lauchstaedter Strasse. (2) Enlargement of the field to the north and the blocking of Lauchstaedter Strasse were no longer mentioned. (3)

- 25X1 3. [redacted] the construction of two East-West runways was planned. The exact course of the runways could not be determined. (4) Poles, strung with electric wires, were located throughout the entire landing field. Sunday and night shifts have worked regularly since 10 December 1950. The construction is said to be scheduled for completion in May 1951. (5)

25X1	<input type="checkbox"/>	Comments.

- (1) The arrival of building materials for the enlargement of the airfield was previously reported. [REDACTED] 25X1
- (2) The stated boundaries of the enlarged landing field agree approximately with a sketch attached to a previous report. [REDACTED] 25X1  
It is believed that the projected runway will be extended to the west beyond the present boundary of the landing field.
- (3) According to a previous report, the field was also scheduled to be enlarged to the north. [REDACTED]

- (4) It appears improbable that two parallel runways would be scheduled for construction. One of these two runways presumably is a concrete taxiway. Details on the courses of the runway and taxiway are not yet available.
- (5) This date is reported for the first time.
